

3. After that, write an unordered list that will contain as many elements as there are rooms in the house (with the associated size), as shown in this code:

```
<ul>
  <li v-for="(size, room) in house">    </li>
</ul>
```

4. The rendered text for each list element should be as follows:

```
<ul>
  <li v-for="(size, room) in house">
    {{room}}: {{size}} sq.mt.
  </li>
</ul>
```

**Note**

Refer to the complete code, which has been placed at Code/Beginning-Vue.js/Lesson 1-Getting Started with Vue.js/Activity: Creation of Lists with Objects.
